

YOUR WATER METER HAS BEEN UPGRADED!

Dear Resident,

As part of our ongoing efforts to improve services to our customers, we are now offering you direct and secure access to your water usage data. The EyeOnWater suite of available tools includes a secure online website to review and analyze your usage patterns. A consumer smartphone app is also available, and can be downloaded from the app store.

With these tools, you are now able to view your hourly usage activity, and gain greater understanding and control of the amount of water you use. EyeOnWater Online provides easy to understand graphs and the ability to establish alerts—including identifying potential leaks.

To access your personalized online portal visit:

www.eyeonwater.net/signup

You will need the following information to register for an online account:

Zip Code, Account Number,
E-Mail Address.
